

Screening

All members of staff have undertaken a Covid-19 Awareness Course

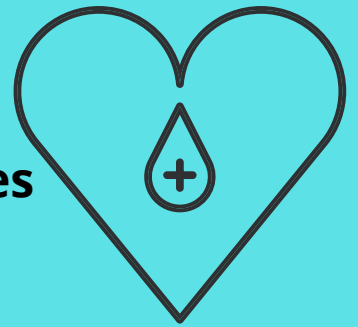

You will be asked a series of screening questions when booking your appointment to reduce the risk of infection to other patients, our Physiotherapists and the wider public.

Cleaning

Many steps will be undertaken, inbetween appointments, to try and ensure a sterile environment within the clinic:

- Surfaces disinfected
- Plinths wiped clean
- Thorough hand-washing by Physios
- Doors handles, key-boards and card machines wiped
- Rooms will be ventilated
- Processes for safe disposal of PPE and clinical waste

Protecting

- Physios will be wearing masks, gloves and aprons
- Where possible Physios will maintain 2m distance from patients
- Patients **MUST** wear masks for appointments
- Staggered appointments to allow time for cleaning
- Only one patient in clinic at a time
- Hand Santiser supplied **MUST** be used on arrival and when leaving the clinic
